

Resichem Corrosion Protection

Resichem corrosion protection products offer a versatile range of solutions to industrial erosion, corrosion problems. The products ensure minimal downtime of production areas or processing equipment and in many cases are tolerant of less than ideal surface preparation.

The materials are widely used in industry and ensure that expensive capital equipment and structures are given long term high performance protection from their environment

501 CRSG

Two pack solvent free high build epoxy coating with good adhesion and corrosion protection

502 CRXF

Fast curing version of 501 CRSG, touch dry 2 hours

506 Aluprime

Two pack solvent based epoxy corrosion coating, tolerant of manually prepared surfaces

507 DWPU

Two pack solvent free PU coating, with WRAS approval

508 UVPU

Two pack solvent based polyurethane coating with UV stability, tolerant of previously coated surfaces

The Resimetal corrosion protection range has been used in the Marine, Power, Chemical, Water and Paper industries.

Typical applications include –

Coating of structural steel in a marine or industrial environment	Pipe bridges
External tank coating	Pump or valve casings
Marine decking	External pipeline protection
Stairways	Pedestrian bridges
Gas holders	

Features of the product range include –

- Simple use
- Tolerant of less than ideal surface preparation
- Excellent corrosion resistance
- Resistant to weathering and UV degradation
- Brush, roller or spray applied
- All year round application
- Seamless finish
- Good adhesion to previously coated surfaces

Benefits to the user include –

- Reduced downtime of process equipment and production areas
- Cost effective solution
- Reduction in life cycle cost of key operating plant
